

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Author: Duties of the Ministry (sermon), 1748: Sermon before the Governors of the London Hospitals, 1751: Nature of a true zeal considered, with a view to the present design of collating the Hebrew MSS. (sermon) 1760. "Was of a mould framed by Nature, Education and Constitution to be a bishop's chaplain: all humbleness, obsequiousness, flattery and distance. The bishop bred him up to the trade, in which he succeeded very well,...though to do him justice, a very honest, sober, good-tempered man." (Cole, xxvii. 131.) His canonry of Ely was only given to him for a few months till the bishop's son (v. John Gooch) was of age to hold it. His appointment to Mattishall was a very scandalous one. When the living was vacant, the master (Gooch), by persistent absence, prevented the holding of a college meeting: in due time the living lapsed to the bishop (Gooch), with the result that the bishop's chaplain was appointed, though, as a junior fellow, not entitled to it. The fellows, perceiving the master's design, took the opinion of counsel; but were informed that redress was very doubtful, and that there would be certain risks in proceeding against a Lord of Parliament (Coll. MSS. 621, p. 284). Goodall continued to hold the mastership of the Perse School for nine years after his appointment to a living.
